REASONS FOR ALLOWANCE

- Applicant's arguments, see page 7, lines 1-11, filed 10 August 2004, with respect to claim 1 have been fully considered and are persuasive. The rejection of claim 1 has been withdrawn.
- The following is an examiner's statement of reasons for allowance: The present invention is directed towards a method and apparatus for a capacitive image acquisition. The closest prior art, Bird et al. (USPN 6,108,438) shows a similar system, in which, a fingerprint sensing device comprises an array of sense elements which each include a sense electrode, providing in combination with an overlying fingerprint part a capacitance, and first and second diode devices connected respectively between the sense electrode and associated ones of first and second sets address conductors. However, Bird et al. fail to address: "wherein further electrodes arranged in the grid and capacitively coupled to one another, a local average value of a corresponding measurement of the electrical capacitances in respectively delimited areas of the image". This distinct feature has been added to independent claim 1 and renders it allowable.

- Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
